## SUMMARY

Passionate and driven Software Engineering undergraduate with hands-on experience in web development, aiming to create impactful solutions at the intersection of technology and innovation. Eager to expand expertise in AI and machine learning, leveraging a strong foundation in software engineering and problem-solving. Actively seeking opportunities to grow, contribute, and make a meaningful difference in the tech industry.

## SKILLS

- Back-end Web Development
- Experienced with Node.js, Django
- Game development with Pygame
- Software Design Principles
- Problem Solving

## WORKING EXPERIENCE

### FREELANCE WEB DEVELOPER

2024 - Present

- Built robust backend systems using Django, including RESTful APIs for seamless client-server communication.
- Integrated database solutions with SQL/SQLite, ensuring efficient data storage and retrieval for dynamic web applications.

### SOFTWARE INTERN

DATA ELYSIUM SOFTWARE INC.

February 2025 - May 2025

- Collaborated on the development and optimization of internal web applications using modern JavaScript frameworks, enhancing performance and user experience.
- Assisted in debugging, testing, and deploying scalable backend services, contributing to improved system reliability and maintainability.
- Contributed to the development of an AI-powered IELTS exam preparation assistant by designing system prompts for the speaking module and actively developing features for the writing module.

## EDUCATION

- ISLAMIC UNIVERSITY OF TECHNOLOGY**  
BSc. in Software Engineering  
2023-2027
- ST. JOSEPH HIGHER SECONDARY SCHOOL**  
HSC  
2020-2022
